

Instructions for Setting Agent - Soda Ash

For with Tintex Low Temp Fabric Dyes

1. Dissolve Tintex Setting Agent in warm/hot water.

NOTE: Amount to use: 1:1 (i.e. one gram of Tintex Setting Agent for every one gram of Tintex Low Temp Fabric Dye)

2. When completely dissolved add this setting solution gradually to dye the bath containing article, over a ten minute period, moving material in bath during addition.
3. Do not allow setting agent solution to touch the article as you are adding it to the water.
4. Then continue the process as per Low Temp Dyeing Instructions.
